2014. 8. 26. - Maybe start will a blank project that works and **add** a button and fire your code ... Do this stuff for displaying **photo library images swift** coding:

30

If you just want let the user choose image with UIImagePickerController use this code:

```
import UIKit

class ViewController: UIViewController, UINavigationControllerDelegate, UIImagePickerControl

@IBOutlet var imageView: UIImageView!
@IBOutlet var chooseBuuton: UIButton!
var imagePicker = UIImagePickerController()

@IBAction func btnClicked(){

        if UIImagePickerController.isSourceTypeAvailable(UIImagePickerControllerSourceType.S
            println("Button capture")

            imagePicker.delegate = self
            imagePicker.sourceType = UIImagePickerControllerSourceType.SavedPhotosAlbum;
            imagePicker.allowsEditing = false

            self.presentViewController(imagePicker, animated: true, completion: nil)
        }

}

override func viewDidLoad() {
    super.viewDidLoad()
    // Do any additional setup after loading the view, typically from a nib.
}

override func didReceiveMemoryWarning() {
    super.didReceiveMemoryWarning()
    // Dispose of any resources that can be recreated.
}

func imagePickerController(picker: UIImagePickerController!, didFinishPickingImage image: UI
    self.dismissViewControllerAnimated(true, completion: { () -> Void in
```
